

JBM ELECTRIC MOBILITY ECOSYSTEM

CHARGING & POWER INFRASTRUCTURE

& CHARGER

ITS (INTELLIGENT TRANSPORT SYSTEM)

ENERGY STORAGE SUB STATIONS | METERING

OPERATION &

MAINTENANCE

As Charging Infrastructure (Infra) Operator, JBM's targeted scope is to build E-Mobility Infrastructure, duly supported by technology expertise and operational excellence.

- Building a Scalable and Suitable Charging Infrastructure.
- Technology agnostic & ready to adopt any new or upcoming technology in the future.
- Customised Solutions to support your EV market entry strategy and charging infra readiness plan.
- End-to-End Customer Experience Management from designing, planning, integration, deployment & operation management.
- Advance Application Platform support for monitoring charging network 24*7 backed by professionally managed charging network operation centre.

JBM GROUP

JBM Group is one of India's progressive conglomerates with a global presence, engaged in diverse sectors like automotive, bus & electric vehicles, engineering & design services, railways and renewable energy. The Group is globally acknowledged and recognized as a trusted service delivery partner by its customers.

JBM's approach has always been futuristic and focused to remain at the forefront of providing future business solutions for nearly 4 decades. The Group is consistently diversifying into newer areas and promoting sustainable development in alignment to the 'Make in India' vision.

We are providing end-to-end Electric vehicle Charging Infrastructure to support the efficient operations of electric vehicles in India and globally.

TURN-KEY APPROACH:

- 1. Provide an integrated Ecosystem to deliver competetive EV-Charging Solutions and meet EV charger requirements across multiple segments.
- 2. One-Stop Solution provider in the EV segment across India providing comprehensive E-Mobility Solutions, Battery Technology, Electric Bus/Vehicle and Charging Infrastructure.
- **3.** Collaborate with technology providers to facilitate a competitive "Product Positioning Strategy" on Total Cost of Ownership (TCO) model.

JBM INFRASTRUCTURE & E-MOBILITY SOLUTIONS

JBM EV Infrastructure & E-Mobility Solutions' drive has been aggressively focusing on a comprehensive range of clean mobility solutions from design, planning to final execution backed by the right kind of expertise and technical know-how.

Executional Framework

Alliances with Global Technology Leaders for faster time to market & ecosystem development

Centre of Excellence for system integration, design/engineering, software applications and support on protocol testing for system communication

Establishing Research &
Development center for
technology evaluation,
development and customization

Manufacturing/ Assembling of OFF Board & ON Board Chargers, maximizing the localization for charger manufacturing in line with QCDD norms

IOT-CMS SOLUTIONS FOR E-MOBILITY ECOSYSTEM

JBM focuses on the enhancement of in-house technological capabilities with an autonomous and an automatic integrated application network driving this e-mobility and EV ecosystem seamlessly.

This EV charging software solution manages your EV charging network via OCPP, handles management of charging stations, partnership relations, tariffs, billing & payments, CRM, statistics and more. It also provides a convenient way to use your charging stations through a white label mobile app (for iOS and Android).

COMPETITIVE EV CHARGING SOLUTION

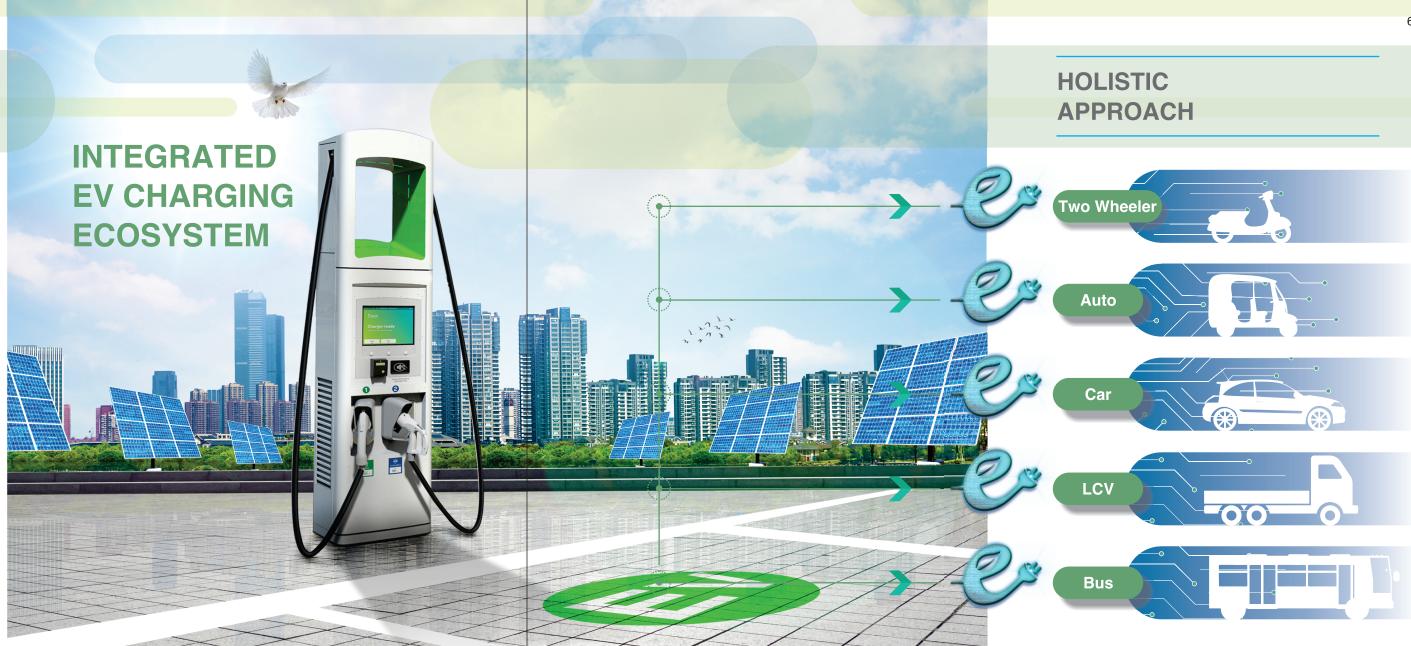

The need for sustainable development and clean energy has compelled large conglomerates to step up and become agents of change. JBM Group is a catalyst of such change.

The Group is a solution provider to create customized EV charging infrastructure and energize E-Mobility.

JBM Unique Value Proposition

Partnership based on mutual trust and transparency:

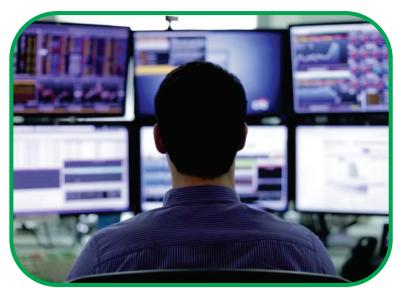

- 1. Market leader with strong track record, values with an eye on the future.
- 2. Immediate strength of scale and scope.
- 3. Competitive R&D & Innovation leader Strong portfolio.
- 4. Extensive synergies ability to create value.
- 5. Compelling customer benefits TCO approach
- 6. Deep customer relationships.

7

INNOVATIVE CHARGING CAPABILITIES

Manufacturing as a Service (MAAS)

Application Platform

Software as a Service (SAAS)

Infrastructure/ Ecosystem Development

Charging as a Service (CAAS)

PIONEERING SEAMLESS EV TRANSITION INTO ACTION

BUSINESS FRAMEWORK

R&D/COE

strong team of qualified engineers to ensure design & delivery

JBM

EV Charging

Portfolio

Standards & Certification

all products tested to follow required norms

Testing Lab

in-house testing facility with all necessary testing instruments

Prototyping & Simulation Centre

in-house simulation lap for demonstration & training purposes

Service Team & Centre

strong service team with all necessary tools to provide the required support in every region

C-NOC

monitoring live chargers working at site from centre location
